# Euroglass™ Frameless Glass Showers

## Selection Guide

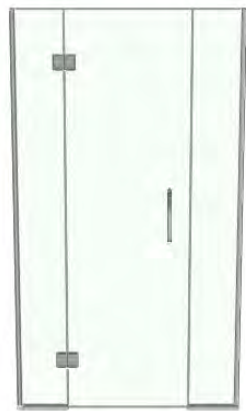

## Shower Selection Process:

Every project is custom designed to achieve a complete solution, specific to your bathroom, and professionally fitted by our skilled installers. Our technical knowledge, attention to detail and warranty assurance ensures a quality product.

## Custom supply and Installations

We can custom make almost any size shower. Six popular designs are shown below. Bath-end showers and quadrant showers are also popular designs. For a more unique design talk to our team today: 0800 847 434.

### Choose a system

#### Hinged Door Systems

A hinged system is the original frameless glass shower design and is available in a range of configurations. These include one sided (in-line), two sided and three sided. Hinged door systems can also be used above baths to provide easy access and an elegant look.

#### Sliding Door Systems

A sliding shower door is the contemporary solution to eliminate a swinging door in tight spaces and is ideally suited to create a large shower area with the most efficient access.

### Choose your glass

We achieve excellence through the production of the highest grade safety glass in our own factories. To improve the elegance and style we recommend the following:

#### VFloat Superclear™

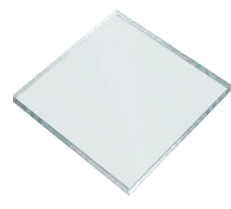

The naturally occurring iron content in glass is what give it a slight green tint. For a crisp clear glass we offer a low-iron option called VFloat Superclear™.

#### PixaGraphic™

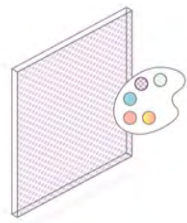

Bring an element of decorative design or privacy with digitally printed glass. Choose from a range of standard patterns or use your own design.

Standard glass

VFloat Superclear™  
Low-Iron Glass

PixaGraphic™  
Digital Print

### Choose your handle

Our quality Euroglass™ hardware fittings and accessories are fully designed, engineered and tested to meet New Zealand building codes. Choose from a range of fittings to complement the style of your space.

### Choose your finish

We can powder-coat your handles to any colour you would like. Polished Chrome, Satin Chrome and black are our most popular options.

### Bathroom accessories

We offer a range of glass shelves, robe hooks and towel rails. These discreet elements provide a holdall for showering essentials and are designed to harmoniously complement the frameless styling of our showers.

### Bespoke mirrors

A custom mirror will perfectly fit and complement your bathroom. Options include polished and beveled edges, shaped or sandblasted designs and hidden demisting pads. We also have a range of tinted mirrors to bring a decorative feature to your space.
